EXAMINER

ART UNIT PAPER

20061112

DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Art Unit: 3654

1. The reply filed on October 16, 2006 is not fully responsive to the prior Office Actions because of the following omission(s) or matter(s):

- It fails to include a listing of the claims that are readable on the elected species and sub-species.
- The claim listing submitted fails to include the proper status identifier, as required by 37 CFR 1.121.

2. Applicant's election of species I, shown in figures 1-3, and subspecies 1, the platform with a camera, is acknowledged.

3. The restriction rules require applicant to list the claims which are readable on the applicant's elected species and subspecies. This requirement was discussed in the previous notice of non-responsive reply. The elected claims should be indicated by a statement within applicant's Remarks Section which lists which of the twenty claims are correlated with the structure of drawing figures 1-3, and the platform having a camera, and which claims are withdrawn from consideration as not being associated with these species and subspecies. Also, as applicant submitted a listing of the claims with the response of October 16, 2006, this listing must include the correct status identifiers for each of claims 1-20. If the withdrawn claims in this listing had the correct status identifiers, i.e., if some of the claims submitted in the reply had the term "withdrawn" in parenthesis after their claim number, then this could be considered as a listing of which claims applicant is considering as readable on the elected species and sub-species. As applicant has failed to include any indication of which claims are the withdrawn claims and which claims are the claims to be examined, and as clearly some of the claims are not readable on elected species and sub-species, such as at least claim 8, applicant's reply is not responsive to the prior Office Action.

4. As this response is incomplete for the same reasons discussed in the previous notice of non-responsive reply, additional time is not given. The period for response continues from the one month given on September 14, 2006. Extensions of that time period may be granted under 37 CFR 1.136(a).

5. An inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Braham whose telephone number is (571) 272-6921. The examiner's supervisor, Ms. Katherine Matecki, can be reached at (571) 272-6951. The fax number for all patent applications is (571) 273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be

Art Unit: 3654

obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Questions regarding access to the Private PAIR system, should be directed to the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
